

PARKS BUILD COMMUNITY PROJECTS

HOLT SCHOOL ROAD PLAYGROUND AND TRAIL IMPROVEMENT

Holt School Road Park is a heavily wooded park featuring a picnic shelter, playground and interpretive nature trail located in Northern Durham. DPR project plans for this park include replacing the outdated playground equipment and enhancing the interpretive nature trail.

The playground equipment is an old slide and bland rocker with little life left. We plan to combine the natural character of the park with nature inspired play elements. We will utilize the existing spaces to install new elements. Included in this project will be an expansion and re-grooming of the interpretive trail. The project will also include installation of play elements along the interpretive trail. The expansion of the trail will allow this space to become an outdoor classroom for the school next door when teaching environmental stewardship.

These improvements will enhance the appeal of the Holt School Road neighborhood park. This park is cherished by its neighbors, but has outdated amenities. New playground equipment and updates to the interpretive trail will draw in more park goers from the neighborhood.
